In this instance, normal use is defined as using an item for cooking and washing it once a day.

The guarantee covers:

Care instructions

All cookware with a stainless steel inside can be washed in a dishwasher.

Steel wool or abrasive sponges should never be used to clean the cookware since they can damage the surface.

When cooking food in a pot with stainless steel inside, always add salt to the water after the water has been brought to the boil. Adding salt to cold water can cause salt stains that will eventually cause corrosion. The base of a cookware is slightly concave when cold, but expands to flatten out when heated. Because of this, you should always leave the cookware to cool off before cleaning it. This allows the base to resume its shape and helps to prevent it from becoming uneven with use. It is also important that you never let the cookware boil dry, because the base then becomes skew.
